REST API Documentation

Base URI: `/api/v1`

Common headers:

- `Content-Type: application/json`
- Authenticated endpoints require cookie `alc_session` or `Authorization: Bearer <session-token>`.

Response envelope:

```
{ "success": true, "message": "OK", "data": {} }
```

```
{ "success": false, "message": "Validation failed", "details": {} }
```

Common status codes: `200`, `201`, `400`, `401`, `403`, `404`, `409`, `422`, `500`.

Endpoint Reference

Method	URI	Description
GET	<code>/auth/config</code>	Public authentication configuration for the React login page.

Method	URI	Description
POST	<code>/auth/login</code>	Postman/basic authentication verification with configured email and password.
POST	<code>/auth/google</code>	Login/register with Google token.
GET	<code>/auth/me</code>	Current session user.
POST	<code>/auth/logout</code>	Revoke session and clear cookies.
POST	<code>/enrollment-requests</code>	Public enrollment request.
GET	<code>/enrollment-requests</code>	List public requests.
GET	<code>/users</code>	List users.
PATCH	<code>/users/{id}/role</code>	Assign internal role.
GET	<code>/roles</code>	List roles.
GET	<code>/permissions</code>	List permissions.
GET	<code>/branches</code>	List branches.
POST	<code>/branches</code>	Create branch.

Method	URI	Description
PATCH	<code>/branches/{id}</code>	Update bran
GET/POST/PATCH	<code>/students</code>	List/create/u students.
GET/POST/PATCH	<code>/teachers</code>	List/create/u teachers.
GET/POST/PATCH	<code>/dance-categories</code>	Manage dan categories.
GET/POST/PATCH	<code>/dance-styles</code>	Manage dan styles.
GET/POST/PATCH	<code>/class-groups</code>	Manage clas groups.
GET/POST/PATCH	<code>/class-sessions</code>	Manage scheduled sessions.
POST	<code>/student-attendance</code>	Record stud attendance.
POST	<code>/teacher-attendance/check-in</code>	Teacher che

Method	URI	Description
PATCH	<code>/teacher-attendance/{id}/check-out</code>	Teacher check out.
GET	<code>/absence-justifications</code>	List absence justifications
POST	<code>/absence-justifications</code>	Submit absence justification.
PATCH	<code>/absence-justifications/{id}/review</code>	Approve/reject justification.
GET	<code>/reports/branches/summary</code>	Branch summary report.
GET	<code>/reports/scholarships/{studentId}/candidate?from=&to=</code>	Scholarship candidate check
POST	<code>/scholarship-evaluations</code>	Register scholarship evaluation.
GET	<code>/scholarship-evaluations</code>	List scholarship evaluations.
GET	<code>/reports/level-promotions/{studentId}/candidate?from=&to=</code>	Level promotion candidate check
POST	<code>/level-promotion-evaluations</code>	Register promotion evaluation.
GET	<code>/level-promotion-evaluations</code>	List promotion evaluations.
GET	<code>/reports/teachers/{teacherId}/payment</code>	Teacher payment calculation.

Method	URI	Description
GET	/audit-logs	List audit log

Validation Evidence

- Automated API validation command: `cd 06Code && npm run test:api:validation`
- Latest generated report: `03Documentation/api-validation-report.md`
- Latest JSON result evidence: `070ther/api-validation-results.json`
- Manual Postman verification assets: `postman/American-Latin-Class-API.postman_collection.json` and `postman/American-Latin-Class.postman_environment.json`

The automated validation covers auth config, Postman email/password login, malformed Google token rejection, Google session creation with mock test tokens, JWT Bearer access, session revocation, revoked token rejection, anonymous/private redirects, RBAC failures, public enrollment validation, CRUD flows, attendance duplication rules, teacher check-in/check-out, absence review, reports, scholarship evaluations, promotion evaluations and audit log visibility.

JSON Examples

Postman password login:

```
{
  "email": "verification-admin-real-20260624154645@alc.test",
  "password": "AmericanLatin2026!"
}
```

Google login:

```
{
  "idToken": "eyJhbGciOi..."
}
```

Login response:

```
{
  "success": true,
  "message": "Login successful",
  "data": {
    "sessionToken": "eyJhbGciOi...",
    "tokenType": "Bearer",
    "expiresInMinutes": 120,
  }
}
```

```
"user": {  
  "id": "d8c025f6-bcd0-4f25-a6b1-1486338678e7",  
  "email": "student@example.com",  
  "name": "Student Example",  
  "role": "Student"  
}
```

Postman authenticated request:

```
GET /api/v1/auth/me  
Authorization: Bearer {{session_token}}
```

Logout invalidates the backend session:

```
POST /api/v1/auth/logout  
Authorization: Bearer {{session_token}}
```

After logout, the same token must return **401** :

```
GET /api/v1/auth/me  
Authorization: Bearer {{session_token}}
```

Student attendance:

```
{  
  "studentId": "85f4bbe9-5d5f-4126-89b6-ddd9de432885",  
  "classSessionId": "76f37581-dbbc-4201-bb13-67fbc86f6d60",  
  "status": "present",  
  "notes": "On time"  
}
```

Scholarship evaluation:

```
{  
  "studentId": "85f4bbe9-5d5f-4126-89b6-ddd9de432885",  
  "percentage": 50,  
  "theoryScore": 82,  
  "practiceScore": 91,  
  "approved": true  
}
```

Error response:

```
{  
  "success": false,  
  "message": "Insufficient permissions",  
}
```

```
"details": null  
}
```
