

AMERICAN LATIN CLASS ATTENDANCE SYSTEM

Uri Design

Table of Contents

[URI Design](#)[Conventions](#)[Resource Areas](#)

URI Design

Node API base prefix: `/api/v1`

Python Analytics API base prefix: `/api/analytics/v1`

Conventions

- Use plural nouns for resources: `/students`, `/teachers`, `/branches`.
- Use nested action segments only for domain commands that are not simple CRUD: `/teacher-attendance/check-in`, `/teacher-attendance/{id}/check-out`.
- Use reports under `/reports` because they are read-only projections.
- Use path parameters for identity: `/users/{id}/role`.
- Use query parameters for report filters: `?from=2026-01-01T00:00:00.000Z&to=2026-03-01T00:00:00.000Z`.
- Use JSON request/response bodies.
- Return consistent envelopes: `{ success, message, data }` and `{ success:false, message, details }` for Node APIs or `{ success:false, message, data:null }` for Python analytics errors.

Resource Areas

Area	URI Pattern
Auth/session	<code>/auth/config</code> , <code>/auth/login</code> , <code>/auth/google</code> , <code>/auth/me</code> , <code>/auth/logout</code>

Area	URI Pattern
Users/roles	/users , /users/{id}/role , /roles , /permissions
Academic catalog	/branches , /dance-categories , /dance-styles
People	/students , /teachers
Scheduling	/class-groups , /class-sessions
Attendance	/student-attendance , /teacher-attendance/check-in , /teacher-attendance/{id}/check-out
Justifications	/absence-justifications , /absence-justifications/{id}/review
Evaluations	/scholarship-evaluations , /level-promotion-evaluations
Reports	/reports/branches/summary , /reports/scholarships/{studentId}/candidate , /reports/level-promotions/{studentId}/candidate , /reports/teachers/{teacherId}/payment
Python analytics	/api/analytics/v1/health , /api/analytics/v1/students/{student_id}/attendance-risk , /api/analytics/v1/students/{student_id}/scholarship-readiness , /api/analytics/v1/branches/{branch_id}/performance-summary , /api/analytics/v1/teachers/{teacher_id}/workload-summary
Audit	/audit-logs
